

Home EV charger quote worksheet

Compare the scope before the price. Keep this worksheet locally; no information is submitted. Prepared October 14, 2026.

Your project

Town / city / ZIP _____	Parking type _____
Vehicle make / model / year _____	Current or proposed charger _____
Charger supplied by _____	Normal parking position _____
Preferred mounting position _____	Typical daily miles _____
Usable charging hours _____	Second EV plan _____
Needed-by date _____	Landlord / association permission _____

Equipment and electrical scope

Scope / term	Quote A	Quote B
Provider name and quote date		
Assessment charge / credit toward work		
Exact charger model and supplier		
Hardwired or specified receptacle		
Configured charging current / output		
Vehicle AC charging limit		
Shared or managed charging plan		
Circuit route and run allowance		
Mounting / cable storage / pedestal		
Electrical changes and rationale		
Load-control equipment and setup		
Exterior / trenching scope		
Restoration responsibility		
Permit authority		

Approvals, price and next steps

Record the same scope for each provider. An allowance is not a fixed price; an incentive is not confirmed until the responsible program approves it.

Scope / term	Quote A	Quote B
Who obtains and pays for permits		
Inspection responsibility		
Commissioning and functional check		
Equipment warranty process		
Workmanship warranty / terms		
Exclusions and unknown conditions		
How added work is authorized		
Total before incentives / tax / fees		
Confirmed incentive, listed separately		
Deposit and balance due		
Quote expiration		
Expected schedule and dependencies		

Questions before agreeing

Is any assessment charge due before a quote? Why is additional electrical work needed? Who handles inspection and restoration? How will I approve extra work? What company performs the job?

Notes / agreed changes
